

DRIVER, Russell

Living in the coastal ward for nearly 10 years I have seen extensive development and population growth. I see the great potential our community has for our children, families and local business.

As a builder of 25 years and owning a small business in the area I'm passionate about building a community for our children, our future. Being involved with local interests with my three children I believe we need to make sure our schools, sports and social clubs develop with our population growth.

Small business is another key factor in our development and working with these businesses will provide a good community structure.

My enthusiasm and drive to develop our city is what I believe is needed for a sustainable community. With qualifications in Business Management and Health and Safety I believe I offer the necessary skills to help improve, develop and promote our community.
