Wanneroo

ADOPT A BUSHLAND

REGISTRATION INFORMATION

Thank you for expressing an interest in the City of Wanneroo's environmental education program, Adopt a Bushland. This program is designed for students in years 3 to 7 and works in conjunction with the Department of Education and Training's curriculum requirements. Through this program the City seeks to develop partnerships with local schools and increase environmental knowledge by providing students with classroom learning and opportunities for outdoor, hands-on experience.

The program aims to teach students how to protect remnant areas of bushland through exploring the issues facing these natural areas and putting them at risk. Through adopting a bushland students will learn how to change social behaviours and practices, developing a nurturing attitude towards these delicate patches of nature in an urban environment.

Education is the key to change and the City hopes that through working in partnership with your school we can together achieve positive environmental change for the future.

Before participating in the Adopt a Bushland program please be sure to read the Teacher's Information Kit and familiarise yourself with the various forms which will need to be completed when taking your class into a bushland. All of the program's content can be found at www.wanneroo.wa.gov.au

Please provide the following information:

School name: _____

Address: _____

Telephone: _____ Fax: _____

Principal's Name: _____

Name of the designated contact person for your school: _____

Designated contact's telephone: _____

Designated contact's email: _____

Number of classes and year levels participating: _____

What does your school hope to achieve while participating in this program?

Please specify if there is a bushland near your school you wish to adopt:

Please attach a copy of the schools Certificate of Currency and return this form to:
