

LINE MARKING INFORMATION FOR SPORTS FIELDS

HELP KEEP YOUR MEMBERS SAFE!

Sporting groups can mark reserves for sporting events using the following approved material:

- Chalk
- Whiting
- Ground Marking Paint

Materials such as Lime, Creosote, Sump Oil or Herbicides are prohibited. Prohibited material kills the grass and the root system, forming ruts as the grass dies off which creates an uneven surface and increased risk of injury for sports people. Over time weeds grow back in these ruts and bare patches, making the reserve unsightly, uneven and dangerous for users.

When prohibited materials are used the City of Wanneroo will charge the cost of any required remedial works to the club, sports group or school responsible. In addition the group may find themselves liable for injury claims.

How can I make the lines last longer?

Linemark after the reserve is mowed. Reserves are scheduled to be mowed once every 2 weeks in winter, and once every week in summer.

To find out your reserve's mowing schedule or for more information please contact **Parks Maintenance** on **9405 5000**.
