Dear Sir/Madam

NOTIFICATION OF WORKS - TRAFFIC TREATMENT INSTALLATIONS THE KOONDOOLA AVENUE/HOLLINGSWORTH AVENUE, KOONDOOLA

Council, at its meeting on 10 February 2009, considered a road safety audit conducted into the roundabout at the intersection of Koondoola and Hollingsworth Avenue, Koondoola. As per the resolutions of the report, a project was listed in the City's Draft 2016/17 Capital Works Program for the construction of pre-deflection treatment on the Koondoola Avenue approaches to the roundabout at Koondoola Avenue and Hollingsworth Avenue intersection.

The proposed pre-deflection treatment is shown on the attached Drawing No: 3129-1-0. This drawing, together with details of the project and future updates, will be available on the City's website under 'Your Council', 'Traffic Projects'.

The pre-deflection treatment is designed to assist in the reduction of vehicle speeds on the approach to, and through, the existing roundabout. Some of the consequential advantages of installing the pre-deflections include reduced vehicle speeds, an improved visual cue of the approaching roundabout and the provision of safer cyclist and pedestrian refuges to assist users when crossing the road.

Please note that your property access will not be compromised by the proposed treatment; however, minor disruption may be experienced for the duration of construction. The City will ensure that this disruption is kept to a minimum. You will be notified about the construction work close to the construction schedule. Once completed, the benefits for you and your neighbours should result in a much safer road environment.

Should you have any further queries regarding this matter, then please contact the City's Traffic Services Team on 9405 5000.

Yours sincerely

Manoj Barua
