

# Two Rocks – Sovereign Drive

Image: Birdseye View Photography

## What are the valuable assets in this area?

- The beach
- The dunes and their vegetation
- The roads and associated infrastructure
- Residential properties

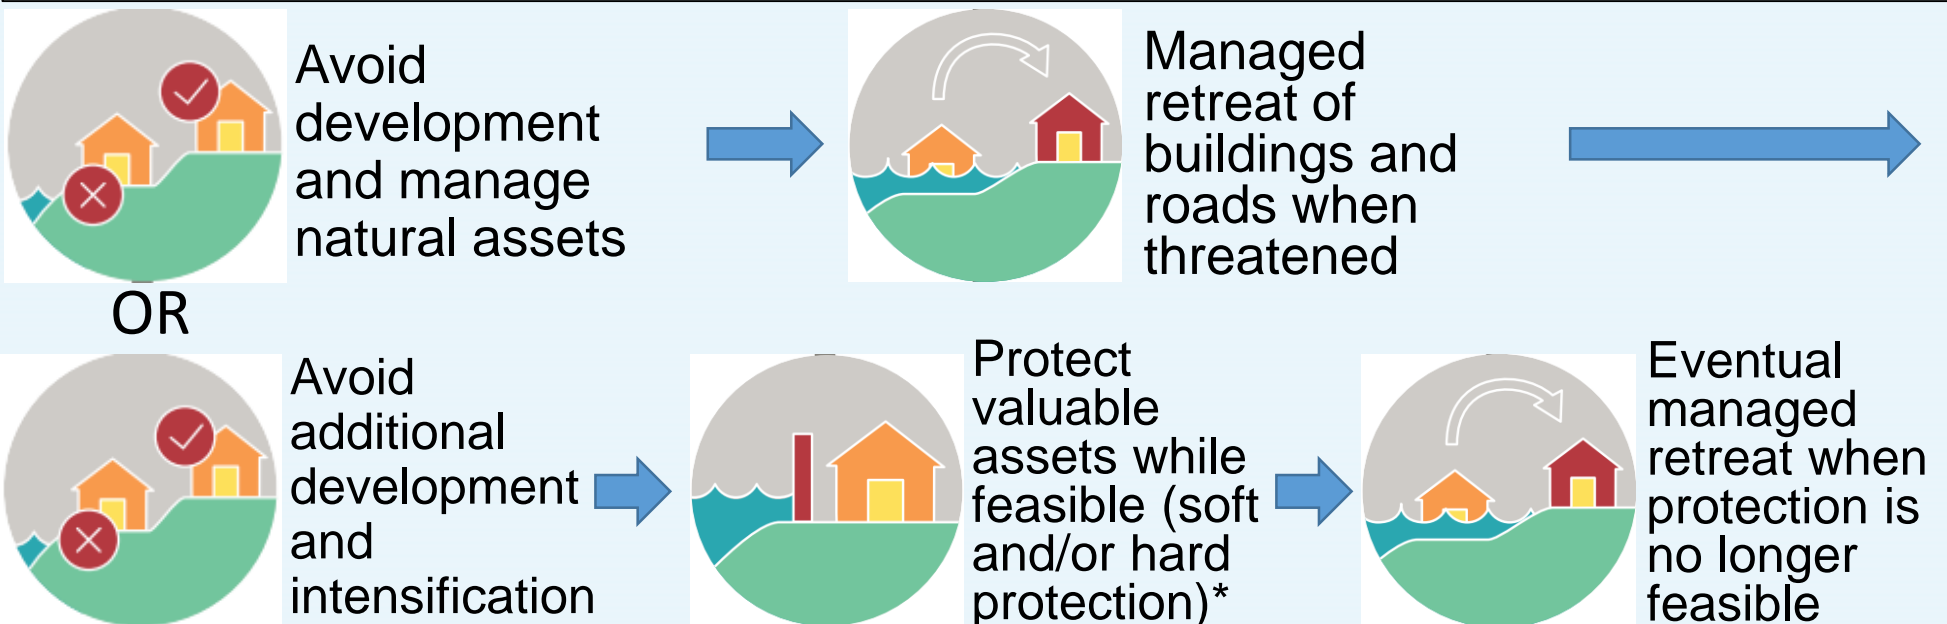

## What action can we take now?

- Notify landowners who may be affected by present and future coastal hazards
- Implement/review planning controls to prevent additional development in coastal hazard areas (except infill)
- Undertake dune care and minor sand management to maintain the dunes as a natural buffer
- Put emergency plans and controls in place to prepare for coastal hazard events
- Monitor the shoreline to see how it is changing and better inform decision making

The City of Wanneroo is working with the Department of Transport to manage this area

## What is the adaptation pathway for this area over the next 100 years?

\*Note: Hard protection structures may result in the loss of the beach in the future and increased problems on adjacent beaches
