Minimum requirements: <ul style="list-style-type: none"> Spa completely dismantled/deflated and removed from the property Cut a minimum of 1 x 500mm x 500mm hole/square in deepest part of bottom 	
Above Ground Pools Installed Above and Below Ground (including inflatables)	Date removed:
Minimum requirements: <ul style="list-style-type: none"> Remove the above-ground liner, ladder, any filtration system and pool structure. Break down any retaining walls to a minimum of 500mm below natural ground level. Remove the demolished material to an approved disposal site. Drain and remove any inflatable pool capable of holding more than 300mm of water. 	

Notes:

- In some localities, impervious soil types, or high ground and perched water tables may make holing pools problematic and advice from a suitably qualified structural or hydraulic engineer may need to be sought as to whether this is a viable option.
- Pools located less than the depth away from boundaries may require a BA20 and BA20A forms to be signed by the adjoining property owner prior to the below ground pool being removed from site.
- Your property will be subjected to 4 yearly internal audit by the City to monitor its status.
- Your pool/spa is now considered decommissioned. A new application for a building permit will be required if you consider reinstating the pool/spa and it will require the fencing standard to be at the appropriate legislated standard; **prior to** reinstating.

By signing this document I / we, the owners of the property above, affirm that the swimming pool/spa that was principally used for swimming, wading, or the like, including a bath or wading pool, or spa, has been decommissioned or removed to meet the criteria above.
