

City of Wanneroo Liveability Survey 2024

Wanneroo - Suburb Summary

In November 2024, in conjunction with Place Score, the City of Wanneroo conducted its second Liveability Survey. This survey was completed by 4357 community members who told us what they value most about their neighbourhoods and how they rate their suburb. These scores were then combined to provide an overall Liveability Index for each suburb.

These results allow us to focus on the things that are most valuable to our community. It helps us to plan and make decisions that will have the biggest impact on your wellbeing. It also recognises that each suburb is different with individual values and experiences. By planning for liveability, we can provide safe, healthy, active and resilient communities and places.

Gender

Age

Top 5 Values - These are the things most important to the Wanneroo community in their ideal neighbourhood

Liveability Index

Liveability is simply what a place is like to live in. Understanding the relationship between people and their places is the key to understanding local liveability, and how it can be enhanced. The Liveability Index is an assessment of how each community rates their suburb. While two locations' scores may be similar, how the community rates each Place Attribute may be quite different within each location.

So what does this score mean?

Based on the national average: 70+ is performing well | 65-69 - average | 50-64 - room for improvement | < 50 urgent care needed

Our Strengths - These are the things you care about most and say are performing well.
We must continue to nurture and protect these attributes.

General condition of public open space (street trees, footpaths, parks etc.)

Elements of natural environment (natural features, views, vegetation, topography, water, wildlife etc.)

Access to neighbourhood amenities (cafes, shops, health and wellness services etc.)

Local businesses that provide for daily needs (grocery stores, pharmacy, banks etc.)

Quality of public space (footpaths, verges, parks etc.)

Walking/jogging/bike paths that connect housing to communal amenity (shops, parks etc.)

Spaces suitable for special activities or special interests (entertainment, exercise, dog park, BBQs etc.)

Amount of public space (footpaths, verges, paths etc.)

Our Opportunities - These are important and performing at moderate levels.
We must monitor these attributes as improvements could contribute to local liveability.

Sense of personal safety (for all ages, genders, day or night)

Landscaping and natural elements (street trees, planting, water features etc.)

Locally owned and operated businesses

Access and safety of walking, cycling and/or public transport (signage, paths, lighting etc.)

Protection of the natural environment

Our Priorities - These are important to the community and are not performing as well as they could.
Improving these will contribute significantly to local liveability.

Sense of neighbourhood safety (from crime, traffic, pollution etc.)
