

City of Wanneroo Liveability Survey 2024

Koondoola - Suburb Summary

In November 2024, in conjunction with Place Score, the City of Wanneroo conducted its second Liveability Survey. This survey was completed by 4357 community members who told us what they value most about their neighbourhoods and how they rate their suburb. These scores were then combined to provide an overall Liveability Index for each suburb.

These results allow us to focus on the things that are most valuable to our community. It helps us to plan and make decisions that will have the biggest impact on your wellbeing. It also recognises that each suburb is different with individual values and experiences. By planning for liveability, we can provide safe, healthy, active and resilient communities and places.

Age

Top 5 Values - These are the things most important to the Koondoola community in their ideal neighbourhood

Liveability Index

Liveability is simply what a place is like to live in. Understanding the relationship between people and their places is the key to understanding local liveability, and how it can be enhanced. The Liveability Index is an assessment of how each community rates their suburb. While two locations' scores may be similar, how the community rates each Place Attribute may be quite different within each location.

Entire LGA

So what does this score mean?

Based on the national average: 70+ is performing well | 65-69 - average | 50-64 - room for improvement | < 50 urgent care needed

Our Opportunities - These are important and performing at moderate levels.

We must monitor these attributes as improvements could contribute to local liveability.

Elements of natural environment (natural features, views, vegetation, topography, water, wildlife etc.)

Amount of public space (footpaths, verges, paths etc.)

Our Priorities - These are important to the community and are not performing as well as they could.

Improving these will contribute significantly to local liveability.

Sense of neighbourhood safety (from crime, traffic, pollution etc.)

Local businesses that provide for daily needs (grocery stores, pharmacy, banks etc.)

General condition of public open space (street trees, footpaths, parks etc.)

Sense of personal safety (for all ages, genders, day or night)

Access to neighbourhood amenities (cafes, shops, health and wellness services etc.)

Overall visual character of the neighbourhood

Evidence of Council/government management (signage, street cleaners etc.)

Access and safety of walking, cycling and/or public transport (signage, paths, lighting etc.)

Sense of belonging in the community

Spaces suitable for special activities or special interests (entertainment, exercise, dog park, BBQs etc.)

Spaces for group or community activities and/or gatherings (sports, picnics, performances etc.)

Quality of public space (footpaths, verges, parks etc.)

Walking/jogging/bike paths that connect housing to communal amenity (shops, parks etc.)
